

A passion for safety and quality

Safety and quality are engrained in the fabric of our culture. In addition, EMCOR's **Be There For Life, ZERO Accident Program** has helped EMCOR companies achieve safety performance that is **5-to-10 times** better than the national average. That's why you can rely on BES for consistently safe, on-time project delivery.

Bahnson, Inc. is part of EMCOR Group, Inc.

Bahnson is a subsidiary of EMCOR Group, a Fortune 500® company. We combine financial strength with unmatched bonding capabilities and an award-winning industry-leading safety program.

An EMCOR Company

Optimum Performance

Maximum Reliability

Founded in 1972, Bahnsen Environmental Specialties (BES) provides a complete array of service, maintenance and validation offerings designed to maintain and enhance the operation of both BES and OEM environmental chambers and freezers. We can also upgrade and retrofit these units to meet additional or future needs. All of our services are provided by a nationwide network of experts who combine technical knowledge, extensive experience, and continuous learning to keep your equipment always performing at its best.

Preventive Maintenance & Calibration:

Consistently superior operation

BES provides accurate, in-depth preventive maintenance and calibration programs for all major types of equipment. Using NIST (National Institute of Standards and Technology)—traceable instrumentation—we can ensure that your equipment always meets or exceeds cGMP (current Good Manufacturing Practices) certification standards in accordance with FDA and ICH guidelines.

Validation & Qualification:

Performance that meets your highest expectations

BES validates and commissions both BES and major OEM chambers and freezers, including centrifuges, autoclaves, water baths, warehouses, incubators, hoods and more. We can generate a standard protocol, customize one to your specific requirements, or execute your protocols and follow your standard operating procedures. Whichever you choose, you'll know your equipment is operating according to the most exacting specifications.

Technical Support: The right answers, the right training

When you have problems or questions, our technical support experts can work with you to resolve even your most pressing issues. We also offer three-day intensive hands-on training, giving your staff the knowledge and skills necessary to optimize your chambers' performance and productivity.

Service & Repair: Emergency preparedness

We provide around-the-clock emergency service through our service centers across the nation. In most locations, we can have a technician at your site within eight hours. Our cGMP-trained professionals will arrive with the right tools and parts to resolve your problem and quickly get your units back in full operation.

Critical Spare Parts: What you need most, when you need them

BES maintains a large inventory of critical spare parts for the most common serviceable issues. We can also tailor a list of the spare parts you need on hand to keep your equipment running smoothly. Add expedited shipping and you have the one place to go for all your parts needs.
